The Starting Questions

THE COLLABORATION TOOLBOX

Question 1: What are your weak points and strong points in group work?
Communication, decision-making, scheduling, conflict resolution, etc…

Weak point: Communication and scheduling, mainly because i tend to work druing unsocial hours

Strong points: I will always do my assigned work.

Question 2: What do you hope to learn as a group during the project?
Communication skills, time-management, conflict-resolution skills.

Communication skills and how to handle deadlines as a team.

Question 3: What do you think the assignment is asking you to do?

Manually implement NLP algorithms just to get an understanding of how they work.

Question 4: What role do you hope to fulfill during the group project?
Leader, communicator, to keep the overview, note-taker, etc…

I hope to be a good communicator during this group project.

Question 5: Which part of the group assignment do you want to take the lead on?
Writing, researching, formatting, etc...

I like the code implementation part but I also do not mind the writing part.

Question 6: What are your goals for the project?
A high grade, a passing grade, to learn something new?

I'm mostly focused on learning NLP foundations since it's a hot topic right now. I have focused only on getting high grades during my bachelor, and that resulted in forgetting a lot of the content over time unfortunately.

Question 7: What type of worker are you?
What are your individual strengths and weaknesses? Writing, researching, formatting, etc....

Overall, I'm good at respecting deadlined, working on algorithm/debugging parts and doing the writing, even if I didn't do the whole implementation myself.

My weakness is that I dislike doing the research necessary for some projects. My patience runs low and I find that many studies use overly-convoluted language for absolutely no reason, which only makes me struggle to understand already-difficult concepts.

Question 8: What personal development goal do you have for this group project?
Become a better listener, take the lead more often, etc.....

Be more open to criticism and learn to trust my teammates with respecting the deadlines (which is hard to do because of bad experiences with other teams in the past).

Question 9 (*Optional*): Give a description of your colour and how you identify with it
For the test, visit our website to find out which colour describes you
